GLP LABORATÓRIOS

CONFIDENCE IN EVERY RESULT

Radioactivity in drinking and mineral water

WATER, SANITATION AND MINERAL WATER

Radioactivity in water, from sampling to report

ISO/IEC 17025-accredited analysis and sampling for the potability standard and for water exports.

Accredited sampling | Auditable report

Potability standard with an accredited report.

GLP serves sanitation operators, municipal water and sewage authorities (SAAEs) and bottlers with analysis and sampling within the same accredited scope.

How GLP supports your operation

Portaria GM/MS No. 888/2021

Gross alpha and gross beta (screening levels) and, if exceeded, specific radionuclides such as Radium-226 and Radium-228.

Exports to Europe

Directive 2013/51/Euratom: tritium, indicative dose and radon, with accredited tests.

Accredited sampling

Wells, springs, treatment plants, distribution networks, reservoirs and mineral water at the source.

More tests in the same report

Rn-222, K-40, total Uranium and Thorium and metals by ICP.

Credentials

ABNT NBR ISO/IEC 17025 · CRL 1266 · ALMERA Network

IAEA, IRD and ERA proficiency testing.

Facility licensed by ANSN

National Nuclear Safety Authority

Regulatory references

Potability of water for human consumption and water destined for the European market.

Portaria GM/MS 888/2021 | Directive 2013/51/Euratom

Applied according to demand.

Accredited matrices: raw, treated, drinking, brackish, saline and wastewater, and mineral water.
